Corrigendum

Corrigendum to “Identification skills in biodiversity professionals and laypeople: A gap in species literacy” [Biol. Conserv. 238, October 2019, 108202]

Michiel J.D. Hooykaas^{a,*}, Menno Schilthuizen^{a,c}, Cathelijn Aten^a, Elisabeth M. Hemelaar^a, Casper J. Albers^b, Ionica Smeets^a

^a Science Communication and Society, Leiden University, Sylviusweg 72, 2333 BE Leiden, the Netherlands

^b Heymans Institute for Psychological Research, University of Groningen, Grote Kruisstraat 2/1, 9712 TS Groningen, the Netherlands

^c Naturalis Biodiversity Center, PO Box 9517, 2300 RA Leiden, the Netherlands

In Fig. 3, because of an error in the R-script, the distribution of species literacy scores of one of the three target groups (the general public) is incorrect: the distribution has shifted 5 score-points to the left. The R-script was altered to make the correct ‘Fig. 3’ (see below). The textual description and interpretation of this figure remain unaltered.

The authors would like to apologise for any inconvenience caused.

The new Fig. 3:

Fig. 3. Distribution of species literacy in the three target groups (i.e. the proportion of each target group achieving a certain identification score).
